

**Maximizing Efficiency & Growth:**

**Implementing AI Solutions for Your Business**

- Jackie Watson-Jaclyn Watson Events

# A little bit about me

As someone with dyslexia, I approach Artificial Intelligence (AI) from a unique angle—one that focuses on how it can empower individuals to thrive in ways they might not expect.

# Fun facts on AI

*AI Has Been Here Longer Than You Think!*

- **1950s:** The term "Artificial Intelligence" was first coined by John McCarthy.
- **1960s-1970s:** AI systems were used in research labs and for playing basic games (like chess!).
- **1980s-1990s:** AI quietly supported industries through predictive models in finance and early data analytics.
- **2000s:** Machine learning powered tools like email spam filters and search engines.
- **Today:** AI is now at the forefront with applications in everything from personal assistants to wedding planning!

**Fun Fact:** The autocorrect feature you've used for years? That's AI in action!

## *AI Empowers People with different styles of thinking or disabilities*

### **For Dyslexia:**

- AI tools like ChatGPT help with spelling, grammar, and organizing thoughts, making communication more seamless.
- Features like text-to-speech can assist in reading complex emails or documents.

### **For ADHD:**

- AI can help maintain focus by creating structured timelines, setting reminders, and breaking tasks into manageable chunks.

### **For Visual Learners:**

- AI can generate visual mood boards or interactive slides, making abstract ideas more tangible.

### **Empathy in Tech:**

- AI can adjust based on individual needs, offering personalized support that complements unique challenges.

# The Role of AI

- **Automation:** Manages scheduling, budgeting, vendor follow-ups.
- **Personalized Recommendations:** Suggests venues, vendors, & styles.
- **Virtual Assistants:** Answers client inquiries and provides updates.
- **Visualization:** Creates mood boards and renders event spaces.

**Engagement Question:** “Which of these tools would you trust to save you the most time?”

# What AI is not

**AI is not here to replace your brain- Use the brain God gave you.**  
Seriously, don't hit snooze on your thinking cap!

**AI won't replace humankind.**  
(Unless you want a robot to do the first dance... which, um, no.)

**Don't let AI write *everything* and just hit "send."**  
Proofread, and add your thoughts people! AI is your assistant, not your boss.

**AI makes mistakes—just like us.**  
Typos, bad ideas, and weird suggestions?

**AI can't read minds.**  
Teach it what you want, or it'll just guess—and probably guess wrong.

**AI won't fix a Bridezilla.**  
That's a "you" problem. AI doesn't do conflict resolution at weddings.

**AI isn't magic.**  
It won't make coffee, find your missing socks, or tell you where Aunt Linda wandered off during cocktail hour.

# What AI is not

**AI can write poems, emails, and even love letters—but legal contracts?**  
Leave that to a human with a law degree!

**AI is not your decision-maker.**  
It's a tool that helps you make decisions.

**AI can't understand your clients' love stories.**  
AI is here to help organize the love story that you put into it.

# The Legalities

## Data Privacy

- **Client Information:** If you're entering personal or sensitive information about clients (e.g., names, addresses, or financial details), ensure that the AI tool you use complies with privacy laws like GDPR or CCPA.
  - **Best Practice:** Avoid including sensitive or identifiable client data

## Intellectual Property

- **Originality:** If the email content is derived from your thoughts and you use AI as a writing aid, the content is considered yours.

## Confidentiality

- Check if the AI tool retains or processes the input data. For sensitive information.

# Content Creation

## Jasper

Jasper is an AI writing assistant who helps create content for blogs, social media, email campaigns, and more. It offers various templates, including those for marketing copy, product descriptions, and long-form content.

## Write sonic

Write sonic is an AI content creation platform that specializes in generating SEO-optimized content, including blog posts, landing pages, product descriptions, and ads.

### Key Features:

AI Article Writer: Quickly generates articles based on brief inputs.

SEO Optimization: Includes tools to optimize content for search engines.

Content Variations: Generates multiple variations of content to choose from.

# Content Creation

## **Copy. Ai**

Copy.ai generates marketing copy, blog posts, social media captions, and more. It's designed to help users overcome writer's block and quickly produce creative content.

### Key Features:

Variety of Content Types: From Facebook ads to blog intros, Copy.ai covers a wide range of content needs.

Customizable Prompts: Allows users to input specific instructions to tailor the content generated.

Collaborative Editing: Teams can collaborate on content creation within the platform.

# Content Creation

## **Blog Writing Assistance:**

AI tools like ChatGPT can help generate blog content ideas, write drafts, or even create complete posts. Regular blogging enhances SEO, drives traffic, and establishes you as an expert in the wedding industry.

## **SEO Optimization:**

AI can analyze your website's content for SEO improvements, such as keyword optimization, meta descriptions, and internal linking, helping your site rank higher in search engine results.

## **Social Media Management:**

AI tools can also assist in crafting engaging social media posts, scheduling them at optimal times, and analyzing their performance. This saves time and ensures a consistent and captivating presence across platforms like Instagram,

Pinterest, and Facebook, which are crucial for reaching potential clients in the wedding industry.

# Chat GBT

**Conversational AI:** Designed to understand and generate human-like text.

**Versatility:** Assists with tasks such as:

- Answering questions
- Drafting emails
- Creating content
- Brainstorming ideas
- Providing personalized recommendations

**Virtual Assistant:** Enhances productivity by streamlining workflows and delivering tailored insights.

# Let's create your avatar and customize your chat GBT

## *Let's Create Your ChatGPT Avatar!*

### •**Define Your Goals:**

- What tasks do you want ChatGPT to help with?

### **Train ChatGPT:**

- Share details about your work style, brand voice, and preferences.

### **Set Expectations:**

- Define how ChatGPT should behave (e.g., creative, formal, or collaborative).

### •**Test and Adjust:**

- Practice asking ChatGPT for different outputs (emails, posts, design concepts).
- Give feedback to refine its understanding of your needs.

•**Quick Tip:** Write a detailed description of your business and upload it for ChatGPT to reference whenever needed.

# Content Creation

- Marketing Materials: Use ChatGPT to generate content for blogs, newsletters, social media, and more, keeping your marketing channels active and engaging.
- Proposals : Automate the creation of initial drafts for proposals, and other client-facing documents.

# Efficiency tools

---

- Meeting Summaries: Use ChatGPT to generate summaries of meetings or client calls.
- Research and Ideation: Get assistance in brainstorming ideas or conducting initial research on wedding trends.
- Using Zoom's Built-In AI Features
  - Live Transcription: Zoom has built-in AI-driven live transcription, which can automatically transcribe spoken words into text during a meeting.
  - AI-Powered Virtual Assistants

# Efficiency tools

---

- Gemini generate various types of content, including text, images, audio, and video. It enhances productivity by assisting with tasks like writing, organizing information.
- Gemini offers AI-driven productivity insights to enhance workflow efficiency.
- Otter AI specializes in real-time transcription and note-taking for meetings.
- Fireflies focuses on automating meeting recording and action item tracking.

# Things you can do right now!

---

- **Automated Initial Consultations:** Ask key questions automatically.
- **Follow-Ups and Reminders:** Never miss a client update.
- **Social Media Interactions:** Quickly respond to comments.
- **Content posts:** Create content for blog, Instagram or facebook feeds

Which task do you want AI to automate first?

# Last thought

---

While AI enhances productivity, it doesn't replace the emotional connections and creativity needed in the wedding industry.

"Don't worry, AI won't steal your job... but it might help you reclaim your weekends!"
